

## **Amendments to the Specification:**

Please replace paragraph [0029] with the following amended paragraph [0029]:

In yet a further variation, it is possible to form the couplings 16 between the outer surfaces of the receptacles 18 rather than between the surfaces 22. Figure 9 depicts two such variations where coupling 16a is attached to two adjacent containers ~~[[16]]~~ 18 at respective points between the flat surfaces 22 and the apex 30 of two adjacent containers 12; and a coupling 16b extends between the apexes 30 of adjacent containers 12. The couplings 16a, 16b can be in the form of one or more strands or webs. It is envisaged that the embodiments depicted in Figure 9 may not be the most convenient embodiments of the invention but nevertheless serve to illustrate that the couplings 16 need not be limited to extending between or lying in the plane of the surfaces 22.
